PROJECT TITLE:

Vaultecho – Turning Silence into Signal

BRIEF PROJECT DESCRIPTION:

Vaultecho is a static safety website built to raise awareness, share survival tips, and provide digital support for personal emergencies. Designed for both men and women, it includes resources like panic shortcuts, safe zone maps, and a public story-sharing board. Users can post safety experiences and view tips to stay prepared for real-world risks — all in a secure, non-chat environment. Vaultecho aims to be a go-to digital safety toolkit for the modern world.

SELECTED PROJECT CATEGORY:

Websites
